

Dear Family,

Students in grades K-6 use GO Math resources as part of the PC math curriculum. GO Math provides resources, activities, and a digital copy of the student text online using the ThinkCentral website. There is a link to GO Math on the Penn Cambria website.

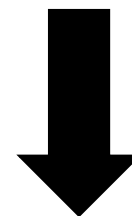

PLEASE CONTACT YOUR CHILD'S TEACHER VIA EMAIL IF YOU NEED

GO MATH LOGIN INFORMATION FOR YOUR CHILD

Follow these steps to access online materials.

1. Go to <http://www-k6.thinkcentral.com>
2. Select your Country, State, District, and School
Note: To make it easier to login later, select the Remember My Organization check box.
3. Type your child's Username and Password
4. Click Log In
Note: If a Set Your ThinkCentral Password page appears, then type a password of your own choosing that you can remember for future logins.

Once logged in, the student homepage appears.

- Click on **MY LIBRARY** to access resources!
 - **Student Edition eBook** – This is a digital copy of the printed student text.
 - **Interactive Student Edition** – This contains the same basic information as the printed student text, but also walks a student through the text with narration and interactive activities. This is a great resource for a student or family who might wish to review material again or for use when a child is absent from class.
 - **Math on the Spot Video Tutorial** – Select the appropriate grade level, chapter, and lesson to view a short video (2-6 minutes) that includes a review and explanation of the content.
- **THINGS TO DO** displays any specific online activities that a teacher may choose to specifically highlight online for practice or review.
- **MY SCORES** will show any scores that come from online ThinkCentral activities only. This isn't an online gradebook, but just a way to look at things done exclusively in ThinkCentral.
